## Samtec Releases New Full Line Interconnect Solutions Catalog

Samtec, Inc., a worldwide leader in the manufacture of electronic interconnect solutions, is pleased to announce the release of its new 2011 Full Line Catalog. This latest edition includes nearly 50 new products, information updates for the existing full line of products and dozens of pages redesigned to highlight product applications. The catalog is available in print, CD, and it can be viewed at [www.samtec.com](http://www.samtec.com).

In addition to new products, the 2011 Full Line Catalog features an updated overview of the latest interactive online Solutionator<sup>®</sup> for designing custom cable assemblies. Solutionator<sup>®</sup> offers millions of design options with an immediate quote, fast delivery and affordable small quantity prices. Also included in the catalog are expanded product features such as a new plating option for edge cards and sockets, new cable components for RF interfaces, and a latching option and press fit termination for select board-to-board connectors.

Samtec's comprehensive line of interconnect solutions is supported with integrated global service, manufacturing and quality strategies, along with its renowned Sudden Service<sup>®</sup>, ensuring the highest quality products, service and information.
