**August 2010**

## **New Guide Illustrates Samtec's Extensive Interconnect Capabilities**

Samtec, Inc. is a worldwide leader in the manufacture of electronic interconnects offering a broad line of standard, "off-the-shelf" High Speed / Signal Integrity cables and connectors, Micro interconnects, and Rugged systems along with the ability to weave these products and features together for custom "mix-and-match" custom solutions. The Samtec "Weave" is a pictorial overview of these capabilities and is illustrated in the new *Interconnect Capabilities Guide*.

Samtec's three focus product categories are Signal Integrity, Micro, and Rugged. In addition to these focus products, Samtec specializes in designing and building custom interconnects including quick-turn "Express Modifications" to existing standard products and "Engineered Customs" for application specific designs there are types of products are common to each of these product categories: Connectors, Cables and Panel & I/O.

The foundation of these interconnect solutions is **SUDDEN SERVICE** which is part of "The Samtec Experience". All this ensures the fastest, most flexible, and highest quality products, services, and information in the industry.
